CEDARS registration issues	<p>Q: I am having trouble getting registered for the site. I was sent an email link, I clicked on it right away but then it said it had already expired. What should I do?</p> <p>A: Please make sure you click the email link only once. If you click it twice, it will say the link has expired. Also, it is quicker to get set up if you choose "community" as your affiliation. If you choose an organization as your affiliation, you will need to wait for approval from an authorized authority at the organization.</p>
